PROFESSIONAL EXPERIENCE

UX/UI Designer, *Iskylar Technologies* 03/2022 – 08/2025
Jaipur, India

- Collaborated with founders, developers, and business analysts to define requirements and deliver **end-to-end digital design solutions** for SaaS and mobile platforms.
- Conducted **user research**, **journey mapping**, and **usability testing** to identify pain points and improve overall product usability.
- Designed and delivered **wireframes, prototypes, and high-fidelity interfaces** in Figma, ensuring intuitive and consistent user experiences across devices.
- Created and maintained **design systems, UI kits, and style guides** to establish scalable and cohesive design standards.
- Partnered closely with development teams for **pixel-perfect handoff** and seamless integration of UI elements.
- Participated in **A/B testing** and iterative design reviews to refine user flows based on feedback and data insights.
- Contributed to **branding decisions** including color palettes, iconography, and typography to align visuals with brand identity.

PROJECTS

Linxness – Crypto Borrowing and Lending Platform

Objective:

Design an intuitive and visually striking digital experience for *Linxness*, a platform that enables seamless crypto borrowing and lending — offering instant disbursements, automated approvals, and real-time repayment tracking powered by smart contracts.

Process:

- Collaborated closely with the business analyst to understand complex financial workflows, user requirements, and compliance considerations.
- Designed a **dark mode theme UI** for the landing page, web portal, and mobile application to enhance visual comfort and modern appeal.
- Created a **comprehensive design system** including typography, color palettes, grid layouts, and reusable components for consistent implementation across platforms.
- Focused on improving readability and visual hierarchy in dark mode, ensuring accessibility and clarity across devices.
- Conducted internal reviews and usability checks to refine visual balance and simplify user interactions.
- Partnered with the development team during handoff, providing component documentation and implementation guidance for pixel-perfect delivery.

Outcome:

Delivered a cohesive dark-themed interface that combined sophistication with functionality. The final design improved clarity across the platform's web and mobile touchpoints, establishing a modern, trustworthy visual identity aligned with fintech and blockchain standards.

Wardrobe – Design System Project
Objective:
Develop a scalable and reusable design system to ensure consistency, efficiency, and visual harmony across the Wardrobe product ecosystem.
Process:

- Designed and structured a **comprehensive design system** in Figma, including typography scales, color palettes, grid systems, icons, and UI components.
- Defined component states, spacing rules, and naming conventions to maintain clarity and ease of use for designers and developers.
- Focused on creating reusable, responsive components that adapt seamlessly across web and mobile screens.
- Collaborated with the product design team to ensure alignment between design guidelines and implementation feasibility.
- Documented usage principles and best practices to support future scalability and faster design handoffs.

Outcome:
Delivered a well-documented and flexible design system that reduced design duplication, improved consistency, and accelerated the product development workflow for future *Wardrobe* interface designs.

Repos – Responsive Sponsorship Management Platform
Objective:
Redesign a cluttered and confusing interface to make the platform more intuitive and user-friendly for sponsors and creators.
Process:

- Analyzed the existing UI to identify usability issues and pain points.
- Simplified user flows by cutting unnecessary steps and improving content visibility.
- Designed clean, organized layouts in **Figma** to enhance clarity and navigation.
- Collaborated with developers for seamless design handoff and implementation.

Outcome:
Delivered a redesigned platform with a simpler flow, clearer hierarchy, and smoother navigation, making the overall experience easier and more engaging for users.

YourFriday – Creator Networking Mobile Application
Objective:
Develop a mobile platform to help artists and creators improve discoverability, connect with sponsors, and build meaningful collaborations.
Process:

- Collaborated directly with clients to understand business goals and target audience needs.
- Defined user personas and mapped user journeys to outline key features and interaction points.
- Created low-fidelity wireframes to validate user flow and overall layout.
- Designed high-fidelity UI mockups in Figma, incorporating client feedback and usability enhancements in each iteration.
- Built a scalable design system including color schemes, components, and typography for consistency across the app.
- Partnered with developers during handoff, providing design assets, flow documentation, and ongoing support to ensure seamless implementation.

Outcome:
Delivered a polished, responsive mobile design that improved content discoverability and user engagement. The final prototype received positive feedback for its intuitive navigation, modern visual style, and alignment with the client's brand goals.

EDUCATION

Bachelors of Computer Applications, *S.S. Jain Subodh PG College* 2021
Jaipur, India

SKILLS

Tools
Figma, Adobe XD, Photoshop, Illustrator, Sketch

Interaction Design
User flows, wireframes, prototyping (low and high fidelity)

Front-End Basics
Familiar with HTML, CSS for design handoff

UX Research
User personas, journey mapping, usability testing, heuristic evaluation

Responsive Design
Adaptive design systems for web and mobile

Testing
User feedback analysis

AWARDS

Most Improved Employee Award, *Iskylar Technologies*
Recognized for driving innovative design processes at Iskylar Technologies.

Prime Creator Award
Delivered high-impact designs, achieving increased client satisfaction.

CERTIFICATES

UX Audits Using Heuristic Evaluation.
Udemy

Web and Mobile Designer 2023
(UI/UX, Figma, Certificate)
